## Portfolio Commentary

- In December, the portfolio delivered a return of -0.80% as the recent rebound experienced across financial assets moderated amidst reduced liquidity conditions heading into year-end
- In this context and with a new set of risks entering the new year, the portfolio maintained its disciplined balance to potential outcomes as markets adapted to a new regime for central banks
- Upside on the month was driven by emerging market debt which continued to bounce back from stressed levels, as well as gold positions where momentum grew steadily over the period
- These profits were offset by the underperformance of corporate credit, convertibles, and inflation-linked bonds, in addition to Treasuries across the US yield curve
- After the sharpest tightening in decades, the Fed is entering a new paradigm with more differentiated conditions driving markets – as such, the opportunity set has grown substantially across fixed income, and we seek to actively monetize this while maintaining a balance to what can come next for the economy

Notes: Correlation is a statistic that measures the degree to which two securities move in relation to each other. NOTES:

**Prior to August 26, 2022, the Wavelength Fund was named the Wavelength Interest Rate Neutral Fund.**

You can not invest directly in an index. The S&P/BGCantor U.S. Treasury Bill Index is a broad, comprehensive, market-value weighted index that seeks to measure the performance of the U.S. Treasury Bill market. The Bloomberg Barclays Global Aggregate Bond Index is a global bond benchmark that includes treasury, government-related, and securitized bonds. The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. Morningstar Global Government Bond Index includes bonds issued by the governments of the world's most robust developed markets. The Bloomberg Global High Yield Index is a multi-currency flagship measure of the global high yield debt market. S&P / Goldman Sachs Commodity Index is a composite index of commodity sector returns representing an unleveraged, long-only investment in commodity futures that is broadly diversified across the spectrum of commodities. Bloomberg World Real Estate Index is a capitalization-weighted index of the leading real estate stocks in the world. HFRX Fixed Income - Credit Index includes strategies with exposure to credit across a broad continuum of credit sub-strategies.

PRINCIPAL RISKS:

The use of derivatives, forward and futures contracts, and commodities exposes the Fund to additional risks including increased volatility, lack of liquidity, and possible losses greater than the Fund's initial investment as well as increased transaction costs. Concentration generally will lead to greater price volatility.

This Fund enters into a short sale by selling a security it has borrowed. If the market price of a security increases after the Fund borrows the security, the Fund will suffer a potentially unlimited loss when it replaces the borrowed security at the higher price. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses. Diversification does not eliminate risk. An investor considering the Fund should be able to tolerate potentially wide price fluctuations. The Fund is subject to high portfolio turnover risk as a result of frequent trading, and thus, will incur a higher level of brokerage fees and commissions, and cause a higher level of tax liability to shareholders in the Fund. The Fund may attempt to increase its income or total return through the use of securities lending, and they may be subject to the possibility of additional loss as a result of this investment technique.

This Fund is a non-diversified fund. Because the fund may invest in securities of smaller numbers of issuers, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely, which may, therefore, have a greater impact on the Fund's performance.

This Fund is not suitable for all investors.
